Section 3 - Hazards Identification

Emergency Overview

APPEARANCE AND ODOR: Clear or white liquid. Solvent odor.

Extremely flammable liquid and vapor. Vapor may cause flash fire. Use water spray to cool materials in or near a fire. Fire may be difficult to extinguish. Vapors may travel, and can be ignited by a remote source.

Inhalation of vapors may cause upper respiratory irritation or central nervous system depression - remove affected individuals to fresh air.

HMSI Ratings: Health = 2* Fire = 3 Reactivity = 0
* indicates a chronic effects

Potential Health Effects

Summary
Vapors from this product may cause eye and upper respiratory irritation, dry throat and mouth, nausea, headache, dizziness, drowsiness, and coma in extreme cases. Prolonged exposures may lead to liver and kidney injury.

Inhalation
Excessive inhalation of vapors may cause nasal and respiratory irritation and central nervous system effects including dizziness, weakness, fatigue, nausea, headache, and possible unconsciousness.

Skin
Irritation may occur with burns if not removed.
Absorption
Can pass through skin and cause symptoms similar to those resulting from swallowing or inhalation.

Ingestion
This product in not intended to be ingested or eaten under normal conditions of use. If ingested, it may cause gastrointestinal (GI) irritation, nausea, vomiting, and diarrhea.

Eyes
Irritation may occur with burns if not removed.

Ears

Primary Routes of Entry (Exposure)
Inhalation, skin, and eye contact.

Target Organs
Upper respiratory passages, central nervous system, skin, eyes, liver, kidney.

Medical Conditions Aggravated by Exposure
Pre-existing chronic eye, skin, respiratory, liver, or kidney diseases or conditions

Section 4 - First Aid Measures

First Aid: Inhalation
Remove to fresh air.

First Aid: Skin
Remove contaminated clothing. Wash exposed areas with soap and water. If irritation develops or persists, seek medical attention. Launder contaminated clothing before reuse.

First Aid: Ingestion
Product is not intended to be ingested or eaten. If this product is ingested, do not induce vomiting and seek medical attention. Do not make an unconscious person vomit.

First Aid: Eyes
Flush eyes with large amounts of water for 5-15 minutes. If irritation develops, or persists, seek medical attention.

First Aid: Notes to Physician
Treatment for inhalation of vapors should be symptomatic with supportive therapy. Skin and eye contact may be treated by washing the exposed area. Removal from exposure will generally result in complete recovery.

Section 5 - Fire Fighting Measures

Flash Point: -14.4°C/6°F
Method Used: TCC
Upper Flammable Limit (UFL): Not determined.
Lower Flammable Limit (LFL): 1.9%
Auto Ignition: Not determined
Flammability Classification: Not determined
Rate of Burning: Not determined

General Fire Hazards
EXTREMELY FLAMMABLE liquid and vapor. May cause flash fire. Keep away from heat, sparks and flame. Keep container closed. Use with adequate ventilation. Containers exposed to elevated temperatures (such as heat or flames) may develop pressure build-up and rupture. Vapors may travel, and can be ignited by a remote source.

"Empty" container warning: "Empty" containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, or other sources of ignition. They may explode and cause injury and death.

Extinguishing Media
Dry chemical, foam, carbon dioxide.

NFPA Ratings: Health = 2  Fire = 3  Reactivity = 1

Fire Fighting Equipment/Instructions
Firefighters should wear full-face, self contained breathing apparatus and impervious protective clothing. Firefighters should avoid inhaling any combustion products.
Section 6 - Accidental Release Measures

Containment Procedures
Remove all sources of ignition. Evacuate and ventilate spill area. Dam spill area with sand, earth, or other suitable absorbent. Prevent entry of material into sewers, other water sources, or land areas. Wear full protective clothing and respiratory protection during clean-up as required to maintain exposures below the applicable exposure limit. Shovel absorbed material into containers in well-ventilated area.

Clean-Up Procedures
No additional information available.

Section 7 - Handling and Storage

Handling Procedures
Use protective equipment as described in Section 8 of this material safety data sheet when handling uncontained material. Keep this material and vapors from this material away from ignition sources, such as heat, sparks, pilot lights, static electricity, and open flames. Containers exposed to elevated temperatures (such as heat or flames) may develop pressure build-up and rupture. Keep containers sealed when not in use and clean spills promptly to reduce air concentrations and floor hazards.

Storage Procedures
No additional information available.

Section 8 - Exposure Controls / Personal Protection

Exposure Guidelines
A: General Product Information
Protective equipment should be used as necessary to prevent irritation of the throat, eyes, and skin, and to keep exposures below the applicable exposure limits identified in Section 8.
